

## Skoolbag App

St Thomas the Apostle has an App for both an Apple and Android device. This App is in addition to our current communication process and in addition allows you to communicate with our front office if your child is unwell or not able to attend school. If you have downloaded your free App from the iTunes App Store (Apple device) or the Google Play Store (Android devices) you can now start personalising it. In the tab at the bottom that says "More" you can select to Setup Push Notifications. This will allow you to select the classes you wish to receive alerts and notifications from, so you will only be receiving alerts relevant to your children. If you have not yet downloaded the App and would like to, simply search for 'Skoolbag St Thomas the Apostle' in the App store for your device.
